

**Good for your skin...  
...light on the earth**

QUENCH PT is a skin friendly and eco-friendly personal care product. It contains 93% of natural, bio-identical ingredients, and 7% of derivatives prepared using sustainable processes that have been approved by national (USDA-NOP) and international organizations (ECOCERT) for use in natural and organic products.

#### MADE WITH ORGANIC INGREDIENTS

Contains over 70% by weight of ORGANIC ingredients. Organic ingredients are certified to be grown, harvested and processed without the use of genetically modified seeds, pesticides, petroleum derived solvents, or any other chemical processes.

#### Ingredients

*Aloe Barbadensis (Aloe) Leaf Juice, Butirospermum Parkii (Shea) Butter, Cetyl Palmitate, Triethylcitrate, Hamamelis Virginiana (Witch Hazel) Extract, Borago Officinalis (Borage) Oil, Dexpanthenol, Glycine Soja (Soybean) Sterols, Glycerine, Cetyl Alcohol, Stearyl Alcohol, Avena Sativa (Oat) Kernel Extract, Squalane, Calendula Officinalis (Marigold) Flower Extract, Stearyl Glycyrhethinate, Bisabolol, Arnica Montana Flower Extract, Algae Extract, Tetrahydrodiferuloylmethane, Sodium Hyaluronate, Allantoin, Sucrose Stearate, Sucrose Distearate, Benzyl Alcohol, Tocopheryl Acetate, Sodium Citrate, Xanthan Gum, Hydrogenated Lecithin, Dehydroacetic Acid, Beta-Sitosterol, Cinnamomum Camphora (Ho Wood) Leaf Oil, Mentha Viridis (Spearmint) Leaf Oil, Citrus Grandis (Grapefruit) Peel Oil, Citrus Medica Limonum (Lemon) Peel Oil, Cinnamomum Camphora (Camphor) Bark Oil, Pelargonium Graveolens (Geranium) oil, Salvia Sclarea (Clary) Oil, Thuja Occidentalis (Cedarleaf) Oil, Lavandula Angustifolia (Lavender) Oil.*

**POST-TREATMENT BALM**  
that is  
**GOOD FOR YOUR SKIN and  
LIGHT ON THE EARTH**

Made with 100% naturally occurring ingredients plus derivatives prepared through sustainable processes.  
No petroleum or animal products.  
FREE of alcohol, PEGs, parabens.  
Made with Organic Ingredients

**DIRECTIONS:** Apply QUENCH PT after skin treatments (laser, filler injections, electrolysis, waxing, and more) to quickly soothe the skin. Repeat application as needed.

QUENCH PT contains 12 of the best studied ingredients of botanical origin that help calm the skin and improve its appearance. In addition, Curcumin liposomes have skin brightening action, and help maintain and even out the skin tone. Also contains Arnica Montana flower extract, traditional herbal ingredient, widely recognized as beneficial to the skin.

Hyaluronic Acid (from fermentation, non-animal), Squalane (plant derived, from olives) and organic Shea Butter make it an excellent moisturizer and soothing balm for after shaving and for sunburned skin.

#### HOW SUPPLIED:

4 Oz (120 grams)  
1/3 Oz (10 grams)

When your skin feels like it's on fire...

# QUENCH PT®

## Post Treatment Balm

...showers your skin with soothing relief

### 12 Botanical Extracts

with proven soothing, calming action

### Curcumin Liposomes

with brightening action to keep the skin even toned

### Hyaluronic Acid, Squalane, Shea Butter

to deeply moisturize

### Arnica Extract

traditional herbal beneficial to the skin

# A strong line-up of natural ingredients with skin soothing activity ...

... plus skin brightening and deep hydration- makes QUENCH PT the ideal post-treatment balm.

## ALLANTOIN

Highly purified (USP grade) compound which is the active principle of comfrey.

## ALOE VERA

Aloe Vera Juice, reconstituted to 100% strength from organic, spray dried Aloe Barbadensis leaves.

## ARNICA

Flower extract rich in sesquiterpene lactones (helenalin) from Arnica Montana flowers. Synergistic combination with soothing Algae Extract, to calm the skin.

## BISABOLOL

Natural bisabolol, sustainably harvested and highly purified. It is the active, soothing ingredient of chamomile flowers.

## BORAGE OIL

Oil extracted from organic seeds of Borago Officinalis, the plant with the highest content of GLA (Gamma Linolenic Acid), an omega 3 polyunsaturated fatty acid essential to the integrity of cell membranes.

## CALENDULA

ECOCERT certified extract from Calendula Officinalis flowers, rich in polysaccharides, flavonoids, triterpenes and carotenoids with beneficial, soothing action to the skin.

## CURCUMIN (THC) LIPOSOMES

TETRAHYDROCURCUMIN (THC, INCI name: tetrahydrodiferuloylmethane), a highly purified compound that is the principal metabolite of curcumin.

Curcumin is the main active ingredient of turmeric (*Curcuma Longa*) roots. THC is formulated in liposomes for maximum skin penetration. Has both soothing and skin brightening action to help maintain an even skin tone.

## DEXPANTHENOL

Highly purified (USP grade) stable analog of pantothenic acid, a vitamin essential to normal epithelial function. Also improves stratum corneum hydration maintaining skin softness and elasticity.

## HYALURONIC ACID

A glycosaminoglycan polymer that is part of the ground substance of the connective tissue, it is the most powerful moisturizing agent known, able to retain 1,000 times its weight in water. Forms a hydrating, protective film on the skin. Highly purified non-animal source, obtained by fermentation.

## LICORICE EXTRACT (STG)

STEARYL GLYCYRRHETINATE (STG) is a highly purified derivative of Glycyrrhetic Acid (GA), the main soothing ingredient from the root extract of *Glycyrrhiza Glabra* (licorice). STG is a fatty acid ester of GA, more liposoluble, and therefore better able to penetrate the stratum corneum. For that reason, it is more effective than GA. STG is metabolized to GA by skin enzymes (esterases), providing a sustained delivery of GA.

## OAT EXTRACT

Extract from *Avena Sativa* (oat) kernels, standardized in Avenanthramides, a group of polyphenolic molecules which are effective at extremely low concentrations. Avenanthramides are among the most potent skin soothing agents known, and have been identified as responsible for the calming action of oat extracts on the skin.

## SOY PHYTOSTEROLS

Highly purified sterols extracted from soy. Structurally they are almost identical to cholesterol and fulfill the same role in human skin, being integral part of and stabilizing the lipid membranes of cells. They have soothing and moisturizing activity.

## SHEA BUTTER

Extracted from organic shea nuts and highly purified to remove potential allergens. Rich in retinol and tocopherol, phytosterols, triterpenes, fatty esters and phenolic acids, it is a powerful emollient and moisturizer to the skin.

## SQUALANE

Non-animal source, extracted from olives. It is a stable derivative of squalane, a natural substance present in all mammalian cells. It has extraordinary skin penetration and moisturizing properties.

## WITCH HAZEL

Distilled from *Hamamelis Virginiana* (witch hazel) leaves and bark, it provides immediate soothing action to the skin.
